JDA will issue PC Sump Version 6.1 and PC Subsoil Version 1 on receipt of payment.

* PC Sump is the standard software for sizing of infiltration basins in Western Australia and is referenced by Main Roads Western Australia for road design packages.

** PC Subsoil is new software for the analysis of subsoil drainage in Western Australia and allows the user to calculate groundwater mounding under a range of conditions including: rainfall recharge, subsoil drain spacing, imported fill hydraulic conductivity, and whether natural the soil below the drains is permeable or impermeable.

- PC Sump V6.1 and PC Subsoil V1 both have a 1 year Licence, with annual renewal at reduced fee.
- No restrictions for use of PC Sump V6.1 and PC Subsoil V1 within your organisation.
- These Licences are not to be distributed outside of your organisation.
- New versions issued free of charge.
